5.2.1 Energy Conservation/ Use of Solar Energy

- The college has installed solar lights in the campus to generate clean electricity.
- In the girls' hostel, a solar-panel system powers the geyser and heating facility, providing hot water without relying on the main grid.
- To reinforce these initiatives, the institution regularly hosts awareness programs, talks, and lectures on energy conservation for students, encouraging them to adopt sustainable habits both on and off campus.
- The college strictly observes a “no unnecessary electricity” policy, turning off lights, fans, and appliances in vacant rooms and common areas to further cut down on wasteful consumption
